PROFILE

Hello World!

I am a UI / UX Designer with extensive experience throughout the full software development stack currently looking to work with an amazing company in the technology field. I hope to find a company that offers a challenging work environment, promotes creative problem solving, and provides great opportunities for career advancement.

EXPERIENCE

Senior Software Engineer III

Meta · July 2022 - Jan 2024

- Member of internal network infrastructure team responsible for redesign and implementation of new fiberoptic network management software
- Used Meta design specifications and in-house component libraries to design custom internal solutions, working with stakeholders for operations requirements
- Implemented front-end designs using Meta technologies, including **React, Relay & Flow**

Sr. UI/UX Developer

Red Hat · Feb 2017 - June 2020

- Worked on Digital Marketing team implementing designs, webpages and applications to support RedHat.com by utilizing **web components** and crafting new **design systems**
- Designed, managed and architected personalization strategy with Adobe Target by conducting **A / B testing** for UI / UX measurements
- Led strategy, **user research**, and development for **accessibility & internationalization**
- Containerized and architected build processes for front-end codebases using **Docker**, GitLab Pipelines, and RedHat **OpenShift**

Front-End Developer

Vail Resorts · Jan 2013 - Feb 2017

- Specialized as front-end developer for multiple product lines including Web, Android, and iOS applications, working in web and natively in **Swift** and **Java** for mobile
- Acted as team lead for front-end developers, helping architect systems, on-board and manage contractors, and lead **Agile** practices

Designer Developer

Various · June 2010 - Present

- Various contract roles in design and development. See portfolio for a selection of works.
